Exploration work performed during the period

Gold Exploration

Gold exploration is being planned on Dios Au33-Lithium33 (Heberto gold northeast extent).

Dios’ gold properties in Lower Eastmain Greenstone Belt: K2, AU33 (Heberto), LeCaron, Clarkie

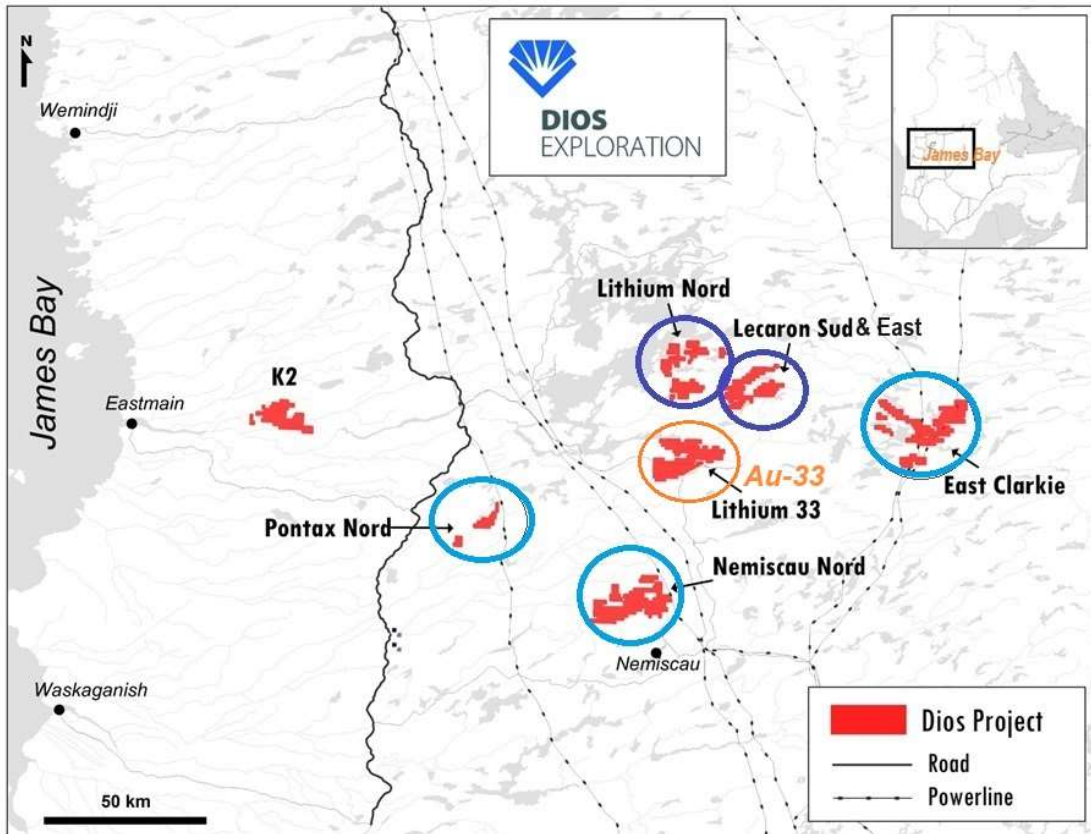

Heberto hole 19 hit 3.65 g/t gold on 13 m (71m-84m) in 64 m @ 1.21 g/t gold (true width)

- DD-19 is located: 50 m south of DD-1 (2.13 g/t gold/22.9 m)
- 50 m south of DD-9 (2 g/t gold/22 m)
- 50 m south of DD-10 (1.8 g/t gold/18.45 m)
- 112 m west of DD-1
- 50 m north of DD-06 (1.94 g/t gold/7.75 m)

A deformation zone striking EW-NE was enhanced on Au33 and should be the focus of future gold exploration work, among others. Several other gold occurrences are present.

Lithium Exploration

A mapping and sampling program was initiated on 4 wholly-owned properties last September: LeCaron, Lithium-Nord, Nemiscau-Nord and East-Clarkie. The focus was on Lithium-bearing pegmatites (LCT type) on selected favourable target-areas. Due to limited time and helicopter and ground accessibility, Dios field program covered less than 12% of claim area. Follow-up is planned for the end of June to cover large areas yet to explore on five lithium potential projects.

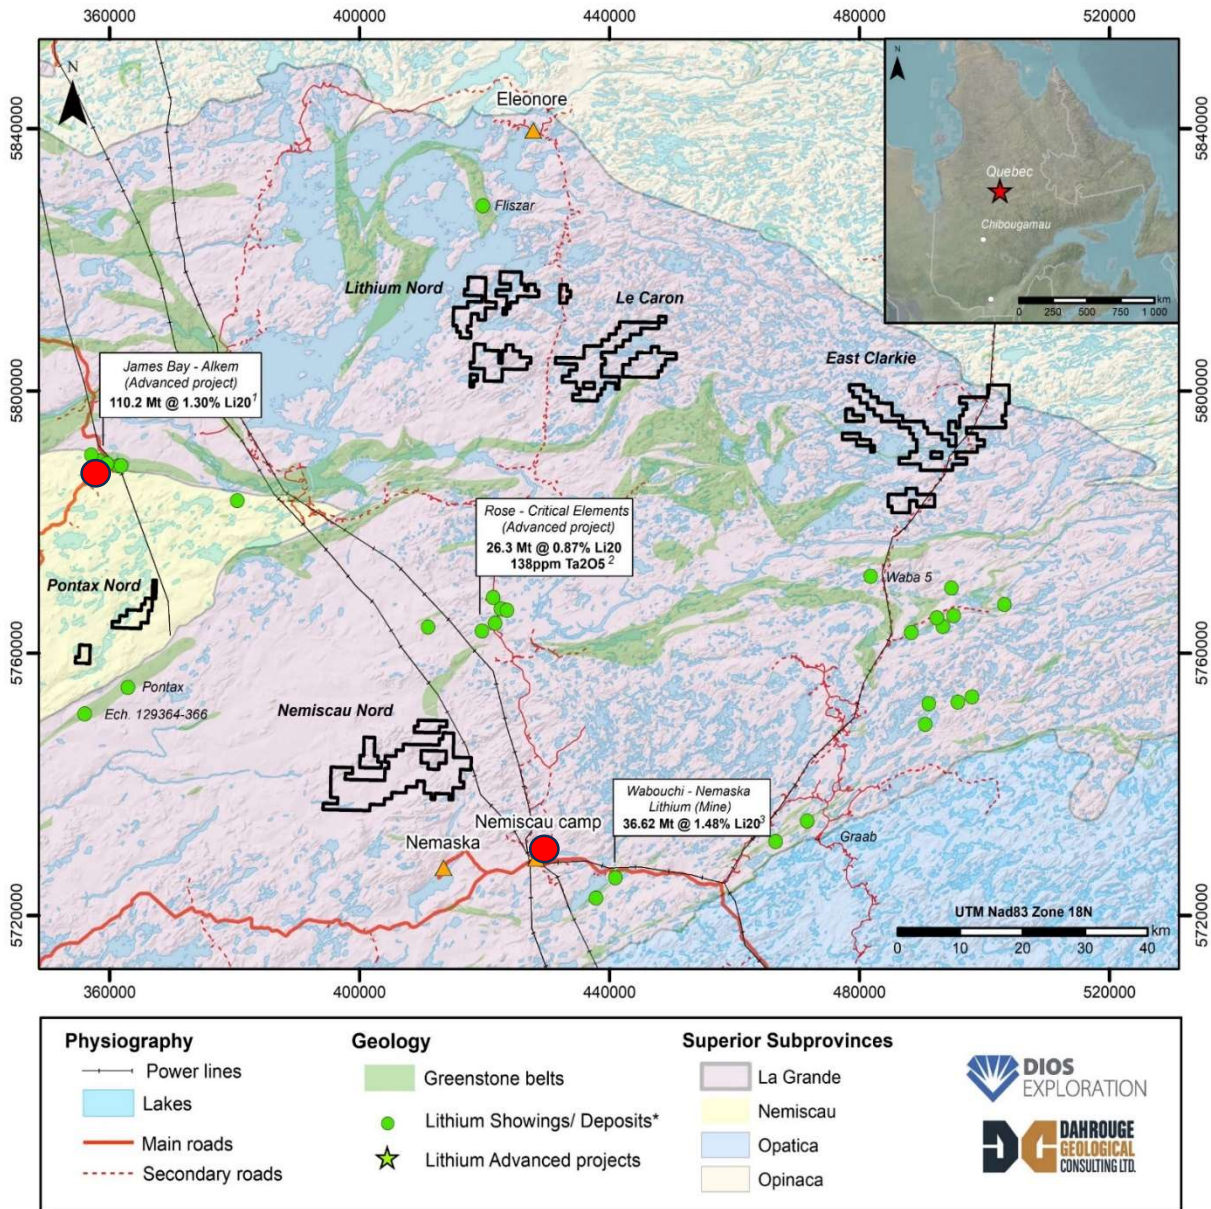

In 2024, follow-up prospection shall focus on first-priority Lithium-Nord and LeCaron projects. Other follow-up will target intermediate-priority work on East Clarkie and Eastern LeCaron including newly acquired claims. A first reconnaissance is planned on Pontax-Nord project.

EBL

Detailed planning and evaluation and research work was completed during the period. Contracts were negotiated for helicopter access, prospecting and exploration crews, food and lodging, etc. Exploration material and equipment was delivered in June.
